

# ABOUT YOUR TESTS PACKAGES, ANALYSES AND SERVICES

EVIO Labs tests all forms of hemp and cbd products, from raw plant material to extractions to infusions (including edibles and topicals), and unique products such as transdermal patches, suppositories, and capsules.

## **CBD SAFETY PANEL: \$ 399.00**

*Package includes:*

- Potency (cannabinoid panel)
- Pesticides
- Heavy Metals
- Microbial Impurities
- Mycotoxins
- Moisture Content

## **CANNABINOID PROFILE (POTENCY): \$75**

*EVIO Labs reports on multiple cannabinoids with the primary focus for Hemp and CBD products being a THC level of less than 0.3 %. All other cannabinoids contained within the Certificate of Analysis are for informational use only.*

## **PESTICIDES: \$225**

*EVIO Labs testing meets or exceeds requirements for all States within the U.S. for potentially harmful chemicals including insecticides, fungicides, plant growth regulators, and other compounds.*

## **HEAVY METALS: \$150**

*EVIO Labs screens for toxic heavy metals including lead (Pb), arsenic (As), cadmium (Cd), and mercury (Hg) using Inductively Coupled Plasma Mass Spectrometry (ICP/MS) instrumentation. Common sources of heavy metals contamination include contaminated soils and nutrients and leeching of metals from vape pens.*

## **RESIDUAL SOLVENTS: \$100**

*EVIO Lab testing meets or exceeds requirements for all States within the U.S. for residual solvents including but not limited to propane, butane, pentane and hexane at a detection level in parts-per-million (ppm).*

## **MICROBIAL IMPURITIES: \$120**

*We test for total Yeast and Mold counts in flower samples. Using rapid development plates, we determine total Yeast and Mold counts, E. coli and Salmonella presence.*

## **MYCOTOXINS: \$75**

*We identify biological contamination of four aflatoxins and ochratoxin A. Aflatoxin is one of the most dangerous mycotoxins that occur as a byproduct of fungal growth on cannabis.*

## **WATER ACTIVITY: \$50**

*EVIO Labs measures water activity for plants. A water activity value below 0.65 disallows growth and cellular activity, including yeast, mold, fungi, bacteria and enzymes that could lead to spoilage.*

## **TERPENES: \$75**

*EVIO Labs reports a minimum of 21 terpenes including commonly found Myrcene, Linalool, Pinene and Terpinolene as well as less commonly found terpenes such as Camphor, Farnesene, and Pulegone. EVIO Labs continues to increase the number of terpenes we detect. Terpenes play a prominent role in the aroma, taste and effects of botanical products and plant-derived essential oils.*

Here at EVIO Labs, we pride ourselves on completing sample testing as soon as possible. Test orders can take up to 10 business days to complete depending on sample volumes.

# HEMP & CBD GUIDANCE FOR SHIPPING

On March 4, 2019, The United States Postal Service released an advisory “Acceptance Criteria for Cannabidiol (CBD) Oil and Products Containing CBD”. The advisory included the following instructions for shippers:

*Any mailer who presents CBD oil or other CBD products derived from industrial hemp for mailing must demonstrate that their mailing is compliant with the Agricultural Act of 2014 by providing the following documentation:*

- A signed self-certification statement, subject to the False Statements Act (118 S.C. § 1001). Statements must be printed on the mailer's own letterhead, must be signed by the mailer, and must include the text “I certify that all information furnished in this letter and supporting documents are accurate, truthful, and complete. I understand that anyone who furnishes false or misleading information or omits information relating to this certification may be subject to criminal and/or civil penalties, including fines and imprisonment.”
- The industrial hemp producer possesses a license issued by the Department of Agriculture, for the state where the Post Office/acceptance unit is located, which includes documentation identifying the producer by name and showing the mailer is authorized by the registered producer to market products manufactured by that producer.
- The industrial hemp, or products produced from industrial hemp, contains delta-9 THC concentration of not more than 0.3% on a dry weight basis
- Mailers must provide, at a minimum, a signed self-certification statement on their own letterhead, a document showing the mailer has authorization to market CBD products by the entity registered or licensed by the State, and a lab report detailing the THC concentration of the CBD product.

EVIO shall obtain copies of the above-described documentation and retain it until the expiration date shown on the state Department of Agriculture license. Also included is a template certification statement. At this time, EVIO discourages use of FedEx or UPS for shipment of hemp or CBD products.

## SUGGESTED TEXT FOR SHIPPING

INSERT SHIPPER NAME  
COMPANY  
ADDRESS

To Postal Handler:

This shipment contains laboratory samples of hemp and/or CBD products. The shipper attests these products have been produced and shipped in accordance with the Agricultural Act of 2014 ("Act"), and the associated advisory "Acceptance Criteria for Cannabidiol (CBD) Oil and Products Containing CBD" released by USPS on March 4, 2019. These samples are being delivered for testing purposes to a laboratory that is accredited by its State to receive, store, and test hemp and CBD products.

I certify that all information furnished in this letter and supporting documents are accurate, truthful, and complete. I understand that anyone who furnishes false or misleading information or omits information relating to this certification may be subject to criminal and/or civil penalties, including fines and imprisonment.

Sincerely,

INSERT SHIPPER NAME
